

LOCAL COOPERATION

Your reliable partner

www.vsb.energy

energy for you

„I believe that close cooperation with partners from the region is essential for the realisation of any challenging wind farm project. This has always been the key to the success of our work.“

Christopher Small
Managing Director: Northern Europe

PROFESSIONAL NETWORK

We have a wealth of project development experience in the wind energy sector and we would be delighted to help you bring your project to life. Let your business benefit from our expertise in project planning, financing and implementation:

- Long-standing relationships with leading equipment manufacturers, reputable investors and renewable energy specialists
- Early dialogue with decision-makers in local government and with the residential population, actively encouraging constructive comments from the public
- Combining local expertise with a strong international network and profound knowledge of the regional landscape

STRATEGIC COLLABORATION

Together we will create a synergy to work effectively day by day towards our common goal: a sustainable and resource-conserving energy future.

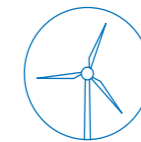

- Extending and strengthening independent and sustainable energy production in Finland
- Benefitting the local economy by creating work for regional contractors and jobs for local people
- Providing custom advice on technical and project-specific matters

PROJECT FINANCING AND ACQUISITION

Raising funds to commence, and maintain, the forward movement of their projects is one of the biggest challenges project developers face. VSB will create financing opportunities and could step into your project at any stage.

- Creation of custom solutions for the sale of your project rights
- Provision of regular and reliable advice for all technical and wind farm related matters
- Solid expertise and long-standing experience

YOUR PERFECT PARTNER FOR EPC PROJECTS

Whilst there are much greater risks during the approval phase of a project than during its actual implementation, the procurement and installation of wind turbine generators and their connection to the grid can be an additional burden to your project schedule.

Why not let VSB do this for you? In collaboration with our professional partners, we work to the highest quality standards to provide you with the legal certainty you require:

- Expert supervision/assistance for all development stages of your project
- Efficient wind turbine and other hardware procurement management
- Professional execution of construction works, and safe and reliable commissioning

Our vision as a service provider:

Future Energy Independence

In collaboration with our parent company VSB Holding GmbH, the VSB Uusiutuva Energia Suomi Oy acts as a full-service provider for wind energy projects in Finland. From securing suitable sites, through design and permitting, to financing and construction, our experts work across sectors and across countries. In doing this, we can draw on a 20-year track record of success in the renewables sector.

We believe in a sustainable and clean energy future. Together with local suppliers, public utility providers and energy companies of all shapes and sizes, we advocate and promote the development and use of renewable energy in our day to day work. You too, can benefit from our network within the local economy and our many years of expertise along the entire value chain.

Let us join forces to shape the future of your region. I look forward to stimulating and fruitful discussions with you.

Yours faithfully

Christopher Small
