

## VSB Group becomes partner of Klimaschutz-Unternehmen e.V.

**Dresden, 3 September 2020 – Decarbonising the economy is an ambitious climate protection goal. Renewable energies are the key. VSB Group wants to help companies to switch to green technologies and operate sustainably. That is why the wind energy and photovoltaics project developer and provider of integrated energy concepts is now a partner in the pioneering initiative “Klimaschutz-Unternehmen”.**

Nowadays, assuming social responsibility means standing up for climate protection. Doing precisely that is at the core of VSB Group’s purpose, as it contributes to the expansion of renewable energies. But there are other ways to counteract climate change. This is why VSB has decided to partner with the non-profit organisation “Klimaschutz-Unternehmen e.V.”, offering its conceptual and technical expertise in the field of energy production and efficiency.

“For us, business and climate protection go hand in hand. This is why we have been developing wind and PV parks for over 20 years, advising industry and commerce on how renewable energies can be used to operate sustainably, safely and cost-effectively. We are pleased to contribute our experience to the work of the association and, as its partner, we hope to support and accompany other companies on their way to greater energy efficiency and climate responsibility,” said **Marko Lieske, Managing Director of VSB Holding GmbH**.

“Klimaschutz-Unternehmen e.V.” is an association of companies in Germany whose innovations play a pioneering role in climate protection and energy efficiency. The initiative was founded by the Federal Ministry for the Environment, the Federal Ministry for Economic Affairs and the Association of German Chambers of Industry and Commerce (DIHK). The cross-sector network currently has 39 members and is supported by partners. The companies are implementing forward-looking projects that save energy, reduce CO2 and thus relieve the environment and nature, for example by using energy-efficient production methods and internal company processes.

More information on “Klimaschutz-Unternehmen e.V.” is available at [www.klimaschutz-unternehmen.de](http://www.klimaschutz-unternehmen.de).

### About VSB Group

VSB, headquartered in Dresden, is one of the leading full-service providers in the field of renewable energies. Its core business is national and international project development for wind farms and photovoltaic parks, their operational management and maintenance as well as the operation of its own parks. In addition, VSB supports clients from industry and commerce in matters of energy production and efficiency. Since 1996, VSB has commissioned more than 700 wind energy and photovoltaic plants with a combined installed capacity of approximately 1.1 GW and an investment volume of €1.7 billion. VSB also provides services for around 1.4 GW worth of installed plants. With its affiliated companies, the Group employs over 300 people at 22 locations.
