

VSB Group secures 164.8 MW wind power in Polish December auction

Wrocław/Dresden, 12 January 2022 – Successful end of the year 2021 and strong way ahead into 2022 for VSB Poland: In the Polish energy regulator's auction for renewable energies in December 2021, the project developer secured the largest awarded volume of this bidding round with 164.8 MW.

In the second government auction in 2021, the VSB Group secured two wind energy projects equivalent to 123.2 MW and 41.6 MW each. Both bids for a tenor of 15 years managed to secure high prices. They are located in the voivodeships of Wielkopolska and Silesia. The goal is to have the sites up and running by 2025. Together with the Baranów-Rychtal wind farm currently under construction, the company has already secured over 200 MW in the 2020 and 2021 auctions.

“Our successful participation in these auctions shows that we are on the right track as a partner and pacesetter in the Polish wind market. A great success for a dedicated team here in Poland and at the headquarters in Germany,” said **Hubert Kowalski, Managing Director of VSB Energie Odnawialne Polska sp. z o.o.**

VSB in Poland

VSB established a Polish presence in Wrocław in 2008, and has already commissioned around 76 MW and services over 300 MW nationally. This includes the Taczalin wind farm, which supplies 100% of green electricity to the Mercedes-Benz plant in Jawor (Lower Silesian Voivodeship). The power purchase agreement (PPA) for this was concluded in the summer of 2018.

About VSB Group

VSB, headquartered in Dresden, is one of the leading full-service providers in the field of renewable energies. Its core business is national and international project development for wind farms and photovoltaic parks, their operational management as well as the operation of its own parks. In addition, VSB supports clients from industry and commerce in matters of energy production and efficiency. Since 1996, VSB has commissioned more than 700 wind energy and photovoltaic plants with a combined installed capacity of approximately 1.1 GW. VSB also provides services for around 1.4 GW worth of installed plants. With its affiliated companies, the Group employs over 350 people at 22 locations.
