

VSB Group expands in France with acquisition of 143.5 MW wind power portfolio

Nîmes/Dresden, 7 February 2022 – Long-term partnership sealed: together with the companies ADE and 3N Développement, today VSB Énergies Nouvelles, the French subsidiary of Germany-based VSB Group, announces the acquisition of nine wind energy assets, totalling 143.5 MW. The sites are located in six departments. VSB will manage and monitor the various stages of project development, carried out by ADE and 3N Développement, up to the ready-to-build stage.

Growth through partnerships and acquisitions is one pillar of the strategy pursued by VSB Énergies Nouvelles in France to reach its goal of being one of the top five French independent renewable energy producers. This agreement marks the beginning of a long-term partnership with a strong objective: to combine expertise in order to accelerate the commissioning of new renewable capacities and ultimately serve the energy transition in France. The potential of these nine wind energy projects is a total of 37 wind turbines with a nominal capacity of 143.5 MW. The projects are located in the departments of Allier, Creuse, Isère, Oise, Pas-de-Calais and Puy de Dôme.

The projects were originally developed by the companies ADE and 3N Développement. The assignment contract transfers all rights and obligations resulting from the lease agreements, the occupation agreements of the public domain and the deliberations of public authorities relating to the projects. VSB France will manage and monitor the various stages of development of the projects up to the ready-to-build stage.

“VSB, ADE and 3N Développement share common values and the same desire: to actively participate in the energy transition while respecting the territories and local players,” explains **François Trabucco, Managing Director of VSB Énergies Nouvelles**. “This is also the logic that VSB pursues through its six regional offices located in the heart of the territories,” he adds.

“3N Développement is proud to be able to continue to grow with a partner like VSB, with whom we have a shared passion for the development of renewable energies,” continues **Antoine Leclerc, Manager of 3N Développement**.

“Working with VSB for several years in a common desire for energy transition, it is with great pleasure that ADE, thanks to this operation, can continue its growth

by strengthening a sustainable partnership,” concludes **Antoine Pedersoli**, **President of SAS ADE**.

About VSB France

VSB Énergies Nouvelles is a subsidiary of VSB Group. Based in Nîmes, the company has been a major player in the renewable energy sector in France for 20 years. VSB France covers the entire value chain: from the development to the production of renewable energy, including financing, construction, operation, maintenance and administrative management. With more than 129 employees across six regional offices, it achieved a turnover of 23 million euros in 2020 and manages more than 900 MW of wind and solar assets, producing energy to meet the needs of the equivalent of more than 900,000 people. VSB Énergies Nouvelles is active both in France and abroad, with operations in Spain and Tunisia.

About VSB Group

VSB, headquartered in Dresden, is one of the leading full-service providers in the field of renewable energies. Its core business is national and international project development for wind farms and photovoltaic parks, their operational management as well as the operation of its own parks. In addition, VSB supports clients from industry and commerce in matters of energy production and efficiency. Since 1996, VSB has commissioned more than 700 wind energy and photovoltaic plants with a combined installed capacity of approximately 1.1 GW. VSB also provides services for around 1.4 GW worth of installed plants. With its affiliated companies, the Group employs over 350 people at 22 locations.

About ADE

The renewable energy development agency ADE is directed by Antoine Pedersoli and develops wind and photovoltaic renewable energy plants. Located in the Grand-Est region, ADE is already a partner of VSB France in the prospecting and development of wind energy projects in several departments.
