

VSB Poland commissions 42.6 MW wind farm

Dresden/Baranów-Rychtal, July 6, 2023 – The VSB Group, a leading renewable energy company, announces the successful commissioning and full operation of the Baranów-Rychtal wind farm in Poland. With an installed capacity of 42.6 megawatts (MW), the eleven wind turbines generate enough green energy per year to power approximately 40,000 households.

Poland has set itself ambitious renewable energy targets: the country aims to meet more than half of its energy needs without emissions by 2040. The Baranów-Rychtal wind farm, developed by VSB Energie Odnawialne Polska, the Polish subsidiary of the VSB Group, contributes to this energy transition and serves as a positive signal for the environment and the region.

With a total capacity of 42.6 MW, the Baranów-Rychtal wind farm, consisting of ten Nordex N131/3.9 turbines and one Nordex N117/3.6 turbine, instantly generates green electricity and feeds it into the grid of Grupa Energa, one of the largest distribution grid operators in Poland. The output of the wind farm can supply around 40,000 households with renewable energy. This avoids CO₂ emissions of almost 45,000 tonnes per year compared to fossil fuels.

“The commissioning of the Baranów-Rychtal wind farm is an important step in the development of renewable energy in Poland. We are very proud to contribute to this change with the successful work of our great team in Poland,” says **Felix Grolman, CEO of the VSB Group**.

Hubert Kowalski, Managing Director of VSB Energie Odnawialne Polska, adds: “Our sincere thanks go to our valued partners, contractors, the supportive local community and the authorities of Baranów and Rychtal Municipalities, Kępiński County and Urząd Regulacji Energetyki (URE). Their unwavering support and cooperation have been crucial to the successful development and operation of this wind farm.”

The construction permit for the Baranów-Rychtal wind farm was granted at the end of 2019 and it was then successful in the 2020 renewable energy auction.

About VSB Group

VSB, headquartered in Dresden (Germany), is one of Europe’s leading vertically integrated developers in the field of renewable energies. Its core business is project development of onshore wind and photovoltaic parks, their operational management as well as the operation of its own assets as a growing independent power producer. VSB operates in nine European countries and has a pipeline of more than 13 GW. Since 1996, VSB has commissioned more than 700 wind energy and photovoltaic plants with a combined installed capacity of approximately 1.3 GW. VSB also provides services for around 1.4 GW worth of installed plants. With its affiliated companies, the Group employs over 450 people. Further information: www.vsb.energy
