

VSB Poland announces start of construction at Racibórz wind farm

Dresden/Warsaw/Racibórz, 20 July 2023 – VSB Energie Odnawialne Polska, the Polish subsidiary of the international VSB Group, has started construction of the Racibórz wind farm. The wind farm, with an installed capacity of 41.6 MW, will eventually supply 36,000 households with green electricity.

The Racibórz wind farm will consist of 13 state-of-the-art Nordex N117 turbines, each with a capacity of 3.2 MW. The turbines have a high degree of efficiency. By harnessing the power of the wind, the wind farm will generate clean electricity and reduce annual CO₂ emissions by around 44,000 tonnes.

“In the knowledge that fossil fuels are finite, new paths must be taken to create sustainable conditions for the economy, society and the environment,” says **Marek Matkowski, construction project manager at VSB Energie Odnawialne Polska, the planning and construction company.** “With this project, we are reaffirming our commitment to Poland’s energy transition and supporting the EU’s ambitious environmental goals: away from coal and towards clean, resource-efficient power generation.”

Preparations for the construction of the wind farm started in the second quarter. Roads, crane pads and assembly areas are currently being completed. The substation, cable routes and turbine foundations are already under construction. Completion of the wind farm is scheduled for the end of 2024.

About VSB Group

VSB, headquartered in Dresden (Germany), is one of Europe’s leading vertically integrated developers in the field of renewable energies. Its core business is project development of onshore wind and photovoltaic parks, their operational management as well as the operation of its own assets as a growing independent power producer. VSB operates in nine European countries and has a pipeline of more than 13 GW. Since 1996, VSB has commissioned more than 700 wind energy and photovoltaic plants with a combined installed capacity of approximately 1.3 GW. VSB also provides services for around 2.2 GW worth of installed plants. With its affiliated companies, the Group employs over 450 people. Further information: www.vsb.energy
