

## VSB installs new turbine at Zernitz-Lohm wind farm

**Dresden/Zernitz-Lohm, 26 July 2023 – VSB, one of the leading project developers in the renewable energy field, is pleased to announce the successful commissioning of a Vestas V-150 wind turbine at the Zernitz-Lohm wind farm in the Ostprignitz-Ruppin district of Brandenburg.**

The new 4.2 MW turbine at the Zernitz-Lohm wind farm will generate around 15 GWh of electricity per year, enough to supply around 3,750 four-person households with safe, emission-free, renewable energy.

Construction of the new turbine was successfully completed in the spring of 2023. Finding suitable transport routes during the construction period proved to be a major challenge. However, this was successfully overcome thanks to the solution-oriented cooperation of everyone involved. Using a self-propelled blade lifter meant it was finally possible to transport the large components.

“We are delighted to have successfully completed this project after a construction period of one and a half years,” says **Thomas Winkler, Managing Director of VSB Neue Energien Deutschland GmbH, the company responsible for planning and construction.** “With the commissioning of the Zernitz-Lohm wind farm, we continue to drive forward the expansion of wind energy and the transformation to a green energy landscape together and in close cooperation with local stakeholders.”

VSB's mission is to promote renewable energy worldwide, achieve regional sustainability goals and secure a reliable supply of green energy for future generations.

### About VSB Group

VSB, headquartered in Dresden (Germany), is one of Europe's leading vertically integrated developers in the field of renewable energies. Its core business is project development of onshore wind and photovoltaic parks, their operational management as well as the operation of its own assets as a growing independent power producer. VSB operates in nine European countries and has a pipeline of more than 13 GW. Since 1996, VSB has commissioned more than 700 wind energy and photovoltaic plants with a combined installed capacity of approximately 1.3 GW. VSB also provides services for around 2.2 GW worth of installed plants. With its affiliated companies, the Group employs over 450 people. Further information: [www.vsb.energy](http://www.vsb.energy)
