

POLAND: VSB Group brings Racibórz wind farm online

Wrocław/Racibórz/Dresden, 22 May 2025 – Successful start of operations: Another wind farm from VSB Poland is now online. In the Silesian municipality of Pietrowice Wielkie, the Racibórz wind farm has recently been reliably producing green energy with a total capacity of 41.6 megawatts (MW).

The new wind farm will immediately save around 44,000 tons of harmful CO₂ emissions per year and supply approximately 36,000 households in the southern Polish Silesia region with cleanly produced electricity. This is ensured by 13 turbines of the Nordex N117 type at the Racibórz wind farm, each with an installed capacity of 3.2 MW.

In addition to solely wind or photovoltaic farms, the VSB Group is increasingly focusing on hybrid projects in the Polish market that combine wind, photovoltaics, and battery storage. This integration increases grid stability and maximizes the yield from renewable energies.

Hubert Kowalski, Managing Director of VSB Poland, confirms this: "Our current wind and PV projects demonstrate the great potential of the Polish market. We are accelerating this growth path with hybrid solutions from both worlds and through the integration of battery storage solutions. This increases supply security and improves the flexibility of the energy system."

"With the commissioning of the Racibórz wind farm, we are sending a strong signal for a climate-friendly energy future in Poland and underline our role as an innovation leader in the field of renewable energies," says **Dr. Felix Grolman, CEO of the VSB Group**.

About VSB Group

VSB, headquartered in Dresden, is one of Europe's leading vertically integrated developers in the field of renewable energy. The company is part of TotalEnergies since 2025. Its core business is project development of onshore wind and photovoltaic parks, battery storage solutions, their operational management as well as the operation of its own assets as a growing independent power producer. VSB operates in six European countries and has a pipeline of more than 18 GW. Since 1996, it has installed more than 750 wind energy and photovoltaic plants. VSB also provides services for a portfolio of more than 3 GW and is active in the field of e-mobility for freight transport. With its affiliated companies, the Group employs over 500 people.
