

VSB commissions new wind farm in Puy-de-Dôme

Nîmes (France), 9 April 2026 – VSB France has announced the commissioning of a new wind farm: “Éoliennes de Bosjean”, located in Saint-Sulpice in the Puy-de-Dôme department (63).

Following the announcement earlier this year of the commissioning of its first wind farm in the Puy-de-Dôme department, located in Tortebeisse with an installed capacity of 33 MW, VSB France is now commissioning a new wind farm: “Éoliennes de Bosjean”.

Located in the municipality of Saint-Sulpice, the wind farm comprises six Vestas V110 wind turbines with a total installed capacity of 12.8 MW. Annual electricity generation is estimated at 24 GWh, equivalent to the yearly electricity consumption of more than 12,000 residents, while avoiding approximately 7,800 tonnes of CO₂ emissions per year.

During the construction phase, VSB France ensured that contracts were awarded to local and regional companies, notably working with TP Lyaudet for the earthworks, OTE for the civil engineering works, and Cegelec for the network infrastructure package. CIC Corporate & Institutional Banking (CIC CIB) supported VSB in the financing of the project. VSB France developed and constructed the wind farm and now provides its technical and administrative management.

The wind farm is equipped with a patented next-generation bird detection system supplied by BIOSECO, a European partner.

“With this new commissioning, we now have two wind farms in the Puy-de-Dôme department,” says **Maël Lagarde, Managing Director of VSB France**. “Thanks to these two sites, we will generate no less than 102 GWh, making it possible to avoid 30,000 tonnes of CO₂ emissions per year. This is a great example of how a region can be part of the energy transition and contribute to sustainability for future generations.”

“France is one of VSB’s key markets in Europe. With projects such as Bosjean, we are demonstrating that local value creation, technological innovation and environmental benefits can be successfully combined. As an international developer and operator of renewable energy projects, we are proud to help advance the energy transition in France alongside our partners,” adds **Dr Felix Grolman, CEO of VSB Group**.

About VSB Group

VSB, headquartered in Dresden, is one of Europe's leading vertically integrated developers in the field of renewable energy. The company is part of TotalEnergies since 2025. Its core business is project development of onshore wind and photovoltaic parks, battery storage solutions, their operational management as well as the operation of its own assets as a growing independent power producer. VSB operates in six European countries and has a pipeline of more than 20 GW. Since 1996, it has developed more than 750 wind energy and photovoltaic plants. VSB also provides services for a portfolio of more than 3 GW and is active in the field of e-mobility for freight transport. With its affiliated companies, the Group employs over 500 people.
