

TotalEnergies brings VSB and its German power activities together under “Integrated Power Germany” to develop profitable low carbon energy solutions

Dresden, September 22, 2026 – TotalEnergies is reorganizing its power business in Germany and will bring its activities together under “Integrated Power Germany”. The new business unit will more closely integrate its affiliated subsidiaries QUADRA energy Sales & Origination, Kyon Energy and VSB as well as TotalEnergies’ offshore wind activities in Germany.

With “Integrated Power Germany”, the Company will place even greater focus on core capabilities across the renewable power value chain: the development, construction and operation of wind and solar projects; the development of utility-scale battery storage projects; the direct marketing and aggregation of renewable power generation; and the development of offshore wind projects in the North Sea and the Baltic Sea. The purpose of the new business unit is to foster the development of profitable, low-carbon energy solutions. Alexandre Duret-Proux has taken on the role of Managing Director of TotalEnergies Integrated Power Germany and will lead the new business unit.

“The new structure creates clarity and additional momentum while building on what makes VSB strong: more than 30 years of experience in developing, delivering and operating wind and solar projects. For municipalities, landowners, project partners and investors, this means that VSB will continue to combine local project expertise with TotalEnergies’ financial strength, market presence and integrated power capabilities,” says **Thomas Winkler, Managing Director of VSB in Germany**.

Through the acquisition of QUADRA energy in 2023, Kyon Energy in 2024 and VSB Group in 2025, TotalEnergies has strategically expanded its presence in the German power market. The Company to increase its worldwide net electricity production to more than 100 TWh per year by 2030, with around two-thirds expected to come from renewable sources. Germany plays a central role in TotalEnergies’ European power business, reflecting the scale of its market, its ambitious renewable-energy deployment targets and the growing need for flexibility solutions.

About VSB Group

VSB, headquartered in Dresden, is one of Europe’s leading vertically integrated developers in the field of renewable energy. The company is part of TotalEnergies since 2025. Its core business is project development of onshore wind and photovoltaic parks, battery storage solutions, their operational management as well as the operation of its own assets as a growing independent power producer. VSB operates in six European countries and has a pipeline of more than 20 GW. Since 1996, it has developed more than 750 wind energy and photovoltaic plants. VSB also provides services for a portfolio of more than 3 GW and is active in the field of e-mobility for freight transport. With its affiliated companies, the Group employs over 500 people. About Integrated Power Germany

"Integrated Power Germany" is part of TotalEnergies and brings together the capabilities of VSB, Kyon Energy, QUADRA energy Sales & Origination and TotalEnergies Offshore Wind Germany. The organisation strengthens TotalEnergies' integrated power activities in Germany by connecting expertise across the power value chain. By combining renewable power generation, utility-scale battery storage and other flexibility solutions, power marketing and origination, and offshore wind, the organisation helps deliver reliable, competitive and increasingly decarbonised power solutions for customers and partners in Germany.
