

# VSB ENERGIES NOUVELLES

---

Cultivate excellence!

## SUSTAINABLE IDENTITY.

VSB broadcasts collective energy to serve its territory. As a major player in France's energy transition since 2001, we are committed to developing tomorrow's energy.

With over 20 years of experience developing wind and photovoltaic energy projects, we are a trusted partner offering multi-disciplinary expertise and we have a thorough understanding of our industry.

We design unique, innovative, environment-friendly solutions in partnership with local territories, drawing on our comprehensive technical expertise in developing, financing, building, managing assets and promoting electricity from renewable energy sources. With its comprehensive knowledge of the industry, VSB provides effective support to local authorities, landowners and investors in the market.

### New solutions for every sustainable need.

Do you wish to go green in your community? Upgrade a derelict land? Turn your farm sheds into green energy plants? Delegate the operation of your wind and solar farms? VSB is the guarantor of your efforts.

Expertise to support our territory.

VSB ENERGIES  
NOUVELLES

## COLLECTIVE ENERGY.

VSB énergies nouvelles, a developer deeply rooted in the territory. We are passionate about renewable energies and are convinced that green electricity can and should play a more significant part in the French energy landscape.

## ACTING FOR A SUSTAINABLE, RESPONSIBLE, ACCESSIBLE ENERGY FUTURE FOR ALL!

## A CULTURE OF VALUES.

### OUR MISSION ON THE TERRITORY

We expand and cultivate our expertise along 4 missions.

Our group of experts are committed to:

- Meeting the challenges of climate change.
- Being an independent key player in the energy transition.
- Delivering unique and innovative solutions.
- Enhance the value of our technical expertise.

## HIGH STANDARDS

High quality standards guarantee quality projects!

VSB's QSE (Quality, Safety and Environment) teams work actively to ensure that our best practices in terms of service quality, health and safety and environmental impact are recognised. Thanks to the team's work, we are now ISO-9001, ISO-14001 and ISO-45001 certified. VSB is also AQPV certified, a certification that's specific to the photovoltaic sector and vouches for the company's own skills as well as its subcontractors' activities. VSB is also a member of the French photovoltaic industry's recycling network, holding the PV Cycle certificate and organising the collection and recycling of used panels. We are highly involved in the renewable energy industry and use a comprehensive approach to contribute to developing a better world for people and for the planet through various actions and a committed CSR policy.

## VSB DEVELOPER, AN EXPERT IN RENEWABLE ENERGY.

**Project development is at the heart of our business.** It is an essential aspect of the company's field of action. With the support of a team of experts deployed all over France, VSB guarantees full control of the value chain of renewable energy electricity production. We develop wind and photovoltaic projects, focusing on reliability and efficiency in order to achieve quality.

- Your prime partner.
- Customised solutions in collaboration with local territories.
- Environment-friendly projects.

## VSB PRODUCER, AN EXPERT IN SUSTAINABLE SERVICES.

Acting on its own behalf, VSB develops, finances, builds, operates, maintains and upgrades its own farms and plants. By ensuring a 360° follow-up, we choose to control the different services within a project! Our priority is ensuring optimum farm and plant performance. By offering services tailored to every need, we guarantee your investment will be profitable and efficient.

### VSB EXPERTISE, INCLUDING FOR THIRD PARTIES.

- Financial engineering.
- Construction.
- Asset management.
- Repowering.
- Self-consumption.

VSB, expertise and technical skills in:  
**WIND ENERGY**  
**PHOTOVOLTAÏC ENERGY**

## TERRITORIAL DEVELOPMENT.

Some pictures of VSB's signature farms and plants in France.

### Focus on VSB data.

- 2 GW in development.
- 150 MW built every year.
- 900 MW in asset tracking.

To give you an idea: one MW of wind power produces the equivalent of the annual electricity consumption of 1,000 people in France. One MW of solar power represents the consumption of 600 people in France.

## LET'S HEAR IT FROM THE EXPERTS!

Testimonials.

*"Our daily life is all about building projects together with stakeholders on the local territory, for the local territory. The VSB group dynamic is the key to this". Yann T. Head of North and East Wind Energy Development.*

*"VSB teams are very friendly. We are encouraged to increase the number of exchanges between us to foster group expertise". Audrey H. HR Coordinator.*

*"Sustainability is at the heart of the VSB dynamic, whether we are talking about technique or relations with our client-partners, we work to gain the trust of all by being transparent and professional". Damien G. Construction Engineer.*
