

# VSB Group

Your expert for renewable energy

[www.vsb.energy](http://www.vsb.energy)

energy for you

# Global challenges – regional solutions

Energy policy today means taking political responsibility with climate change management. Therefore, stronger expansion of renewable energy is a logical and economically reasonable decision. No matter where in the world. VSB has already been pursuing this strategy since 1996. As an internationally successful company in the renewable energy sector we lead by example and perform sustainably. You can rely on this leading service provider to plan, develop and manage your renewable energy projects. For you, we combine the knowledge of experienced professionals in energy services.

## Why our customers like us

Because they know that we are a fair and reliable partner. Our high quality standards have been certified according to the **DIN EN ISO 9001:2015** in Germany, Poland, Finland and France. If you also entrust us with your ideas, we will develop your commitment for sustainability into successful designs. This will protect the climate and conserve the environment.

„The increased expansion of renewable energies is THE key to be able to achieve the European climate targets. With passion, know-how, highly motivated employees and the right visions and strategies, the VSB Group makes the world greener and cleaner every day!“

**Felix Grolman, Managing Director (CEO)  
VSB Holding GmbH**

## MORE THAN 30 YEARS OF EXPERTISE

Your green investment needs a sound and reliable partner from the very beginning: and this is VSB. For more than 30 years, our passion for renewable energy has been driving us to find new ways to optimize our service delivery. From site acquisition through planning and construction to operation – here you will find all the necessary skills under one roof. You can decide whether to only use one single component or to benefit from the complete range we offer. Just rely on our experience and the expertise gained from developing more than 750 wind turbines.

## OUR BUSINESS AREAS

**Solar farm development**

**Wind farm development**

**Integrated Energy solutions**

**Energy storage solutions**

**Independent Power Producer**

**Operations & Services**

„We provide our investors with access to investments in sustainable energy infrastructure, which are characterised by stable long-term returns. We are connected to VSB Group by a trusting cooperation and first-class wind energy projects in Germany and France.“

**Francisco Feito, Managing Director  
Renewable Energy SUSI Partners AG**

## **TAILOR-MADE ENERGY SOLUTIONS – A POWERFUL SERVICE PACKAGE**

The expansion of renewable energies is progressing dynamically worldwide. Many countries are transitioning their electricity supply to wind and solar energy sources while concurrently developing concepts to enhance climate-friendliness in various sectors such as heating and transportation, particularly through initiatives like E-Mobility. Similarly, an increasing number of companies, towns and consumers are reorienting themselves. We accompany this process and develop individual solutions with renewable energies that do not stop at greenfield project development. Rather, we combine innovative energy generation and storage technologies in order to sustainably reduce your costs and CO<sub>2</sub> emissions and support you on your way to energy self-sufficiency. No matter whether you are an industrial customer who wants to supply your plant with clean energy or a community that wants to make its contribution to the energy revolution: with us, you receive a tailor-made overall concept and professional implementation from a single source.

## **DRIVING SUSTAINABLE PROGRESS THROUGH INNOVATION**

At VSB Group, we pioneer innovative approaches and technologies to drive sustainable progress. VSB's experienced team is at the forefront of a profound transformation of the European energy landscape. We focus on digitalising and automating processes, as well as accelerating and unifying efforts to transition to a greener, cleaner future – for the benefit of our generation and those to come.

## GLOBAL NETWORK – LOCAL EXPERTISE

Why is it so important for the success of an energy project to be present locally? It is quite simple. Because the framework conditions for renewable energy vary from country to country and from region to region. Only with a thorough understanding of these differences is it possible to implement projects efficiently and successfully.

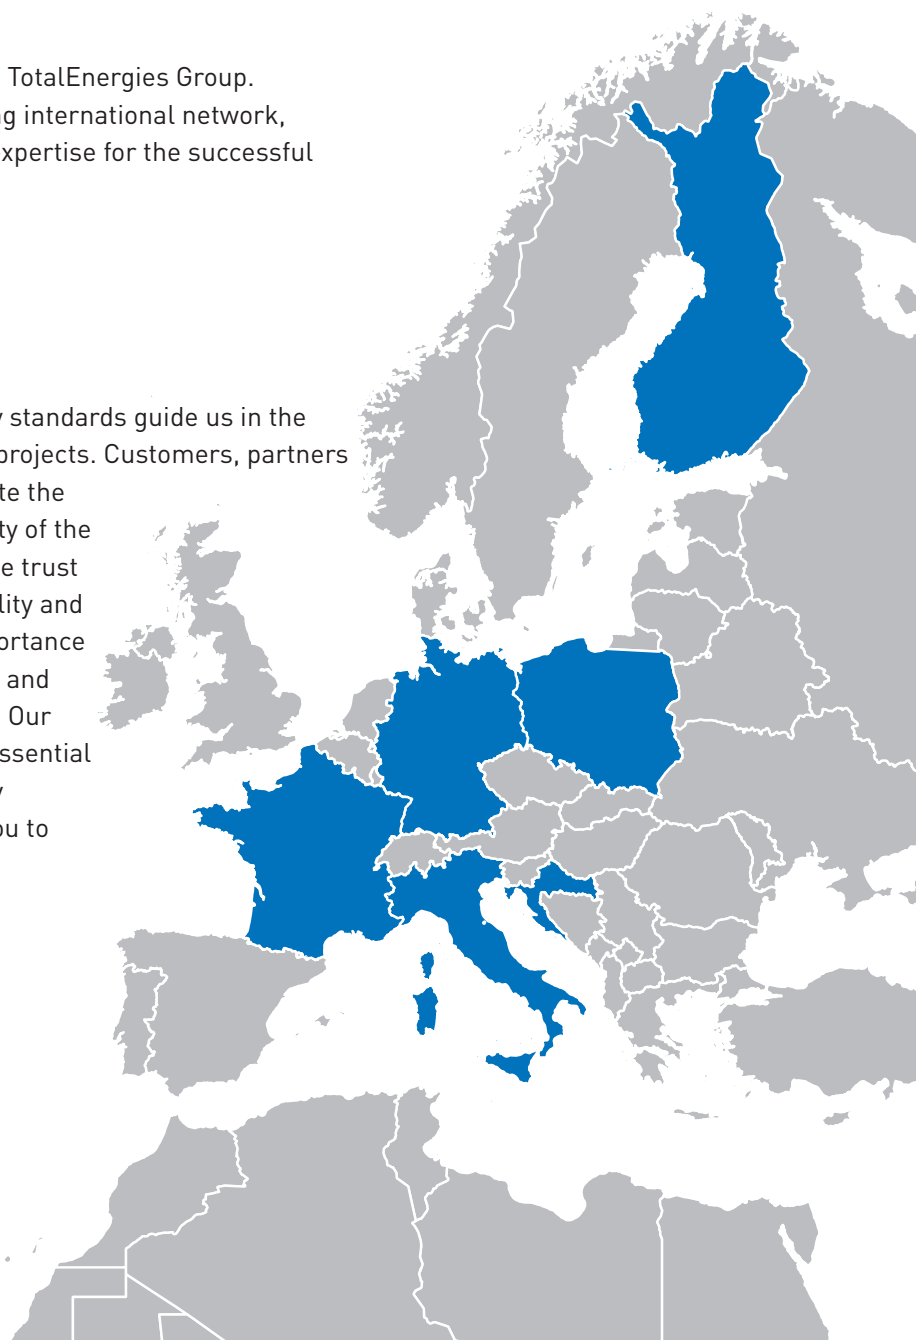

Our teams of experts are well versed in questions of law, financing and administration. They are proficient in complex permitting procedures and familiar with local authorities and political frameworks. Knowing exactly what is required for effective local public relations, our employees are able to respond to specific regional requirements. Furthermore, they maintain strong relationships with leading equipment manufacturers, work closely with established financial partners and cooperate with specialised service providers.

Since 2025, VSB has been part of the TotalEnergies Group. As such, we are embedded in a strong international network, providing access to a wide range of expertise for the successful delivery of our projects.

## OUR RESPONSIBILITY

Our corporate vision and high quality standards guide us in the realisation of our renewable energy projects. Customers, partners and employees particularly appreciate the steady business growth and continuity of the VSB Group. We gain and preserve the trust of our business partners with reliability and professional competence. Great importance is attached to transparency, integrity and fairness – similarly to sustainability. Our behaviour is oriented around three essential criteria: ecology, economic efficiency and social responsibility. We invite you to convince yourself of our qualities.
